Objective: Data Analyst.

Professional Summary

Professional with solid experience in financial management and data analysis, specialized in transforming data into actionable insights for process optimization and support for strategic decision-making. Proficient in Python, SQL, Power BI, and Microsoft Excel, with a proven track record of leadership in financial reporting automation initiatives and the development of customized credit analysis solutions. My analytical approach is complemented by a robust administrative perspective, ensuring that solutions are both technically sound and relevant to the business.

Professional Experience

Neoguard Group | Financial Analyst

2/2024 – 9/2024

- Created a MySQL database integrated with Power BI via Python to automate financial and management reports.
- Implemented ERP systems and business management tools, optimizing internal processes.
